TABLE OF CONTENTS

Executive Summary
Section 2 — Reels Performance
Section 3 — Recommendations
Appendix A: Competitor Snapshot

SAMPLE DATA

EXECUTIVE SUMMARY

16	1.3%	2.4%	3
Reels analysed	Avg reel ER	Best theme ER (ASMR)	Priorities

Headline findings

- Sensory food (ASMR) reels outperform every other theme by ~2x.
- Targets should anchor to the trailing-90-day median x 1.5, not aspirational benchmarks.
- Weekend posts earn the highest engagement; move hero content to Sat/Sun.

SECTION 2 — REELS PERFORMANCE

SAMPLE DATA. All numbers in this report are synthetic and exist only to demonstrate the report builder. Charts are generated by build_report.py from the input JSON.

Theme	# Posts	Avg ER%	Verdict
Food ASMR	4	2.4%	Scale up
Chef Story	6	1.3%	Keep, real footage only
Brand	3	0.9%	Reduce
Educational	3	0.7%	Rework hooks

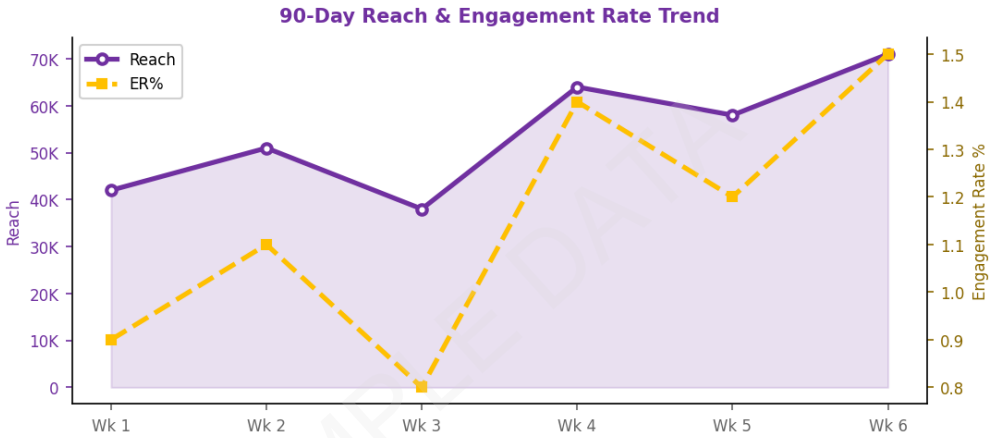

Figure 2.1 — 90-day reach and engagement rate trend. Dual axis: purple = reach (left), yellow dashed = ER% (right). Source: Windsor.ai Instagram connector.

SAMPLE DATA

SECTION 3 — RECOMMENDATIONS

- Two ASMR reels per week anchored to regional dishes.
- Fix measurement first: insights scope on the IG token.
- Weekly writeback of 72h performance into the planner.

☐ Goal inflation: targets 10-25x above baseline make every post look like a failure and hide real signal.
